

Workshops by Inez Bayardo

Classroom Discipline

Children are looking for love and attention, and they express this in many ways; sometimes, inappropriately. This workshop will help attendees identify the difference between punishment and discipline and will offer practical steps on how to administer *discipline* in the classroom.

Kids in Ministry!

Do you ever find yourself a little short handed on Sunday mornings? Need someone to run the power point or press play on iTunes or the DVD player? Some of your best helpers might be under 5ft. tall and sitting in your chairs! It's never too early to serve in ministry. There are many different ways for kids to get involved in ministry at church and in their communities. More than helping yourself, involving kids in ministry will help them become committed adults. In this session we will learn creative ways to get kids involved in service.

Lead Like You

Each one of us was created in the very image of God, we are a reflection of Him... this means we each carry the characteristics of God. Attendees will learn how to identify lead from their God-given strengths and characteristics, unleashing a tremendous amount of confidence and competence in themselves and others.

Learning Styles of Children

Different children learn in different ways. In this session we will explore the learning styles of children and how to adapt your teaching to target these differences for maximum impact.

Simply Put: Easy and Creative Object Lessons

Have you ever had a children's curriculum that required you to make some sort of a concoction to teach a point? Or have you ever looked at the amount of items needing to be purchased for one object lesson and felt completely overwhelmed? In this workshop you will gain creative ideas on how to implement everyday objects as teaching lessons. You will also be presented with "word pictures" that require no objects at all! These lessons are sure to get through to your kids!

Teaching Kids About Bible Doctrines

This workshop will teach attendees how to creatively present biblical foundations to kids in a way that they can grasp and relate to. Such doctrines include: Salvation, Water Baptism, The Trinity, and the Holy Spirit.

Teaching Missions Awareness to Kids

Kids who give become teenagers who give who become adults who give. Teaching kids to give to missions is an invaluable lesson that will stick with them throughout their lives. Missions awareness is more than collecting coins that mom and dad gave little Billy before jumping out of the car on Sunday morning. Missions awareness is presenting the needs and the mandate we have been given to meet these needs; it is cultivating a heart of compassion in our young people. In this session we will discover fun and impactful ways to teach kids about missions.

Vision for Your Ministry

Do you ever have trouble articulating your vision? Do you have trouble identifying your vision? This practical and hands-on workshop will walk you through the process of establishing a vision for your ministry and then creating an action plan to see it through!
